

GHOST CRAB

Well camouflaged with the sand, this common crab might stand so still or move away so fast that it often appears to vanish in front of your eyes earning the name "ghost" or sometimes sand crab. Latin name, ocypoda, means swift-footed.

DOCKET No 99D-0557

FDA:

I am against any xenotransplant research and regardless of the species would like to have ~~them~~ banned outright!! The US should follow Europe's lead. The Council of Europe recommended a world-wide ban on these procedures in January/99.
